In-House AV System

London House Large Common Room

Audio and visual technical specifications

PA System

There is a 2 x Speaker Martin Audio PA system that gives the entire room flawless audio coverage.

Microphones

There are 2 lapel wireless mics and 2 handheld wireless microphones. These are integrated into the system for ease of use, and are pre-programmed to avoid feedback. Also available are 2 x lectern mics to be used with the venue's lectern, for a more formal approach to presenting.

Control

The operation and control of this system is a breeze with the patch panel on the front of the AV rack. There is also an Aux input for playback from devices via a mini jack cable.

Projector & Screen

The LH Large Common Room has a 7000 lumens projector which has a motorised projector screen. The screen is roughly 3m x 1.7m and has a 16:9 aspect ratio.

Connecting your device

You can use our wireless 'ClickShare' USB device to send your images from your laptop to the screen, or a standard HDMI input directly to the wall box via a high speed HDMI cable.
